Project Design Phase-II
Data Flow Diagram & User Stories

Date	31 January 2025
Team ID	
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Data Flow Diagram:

A data flow diagram (DFD) is a traditional visual representation of the information flows within a system. It shows how data enters the system, where it is processed and stored, and where it goes next. The diagram below shows how a standard laptop request moves from the employee to delivery in ServiceNow, with Flow Designer automating each process.

Key: rectangles are external entities, rounded boxes are processes automated in Flow Designer, and open-ended boxes are data stores.

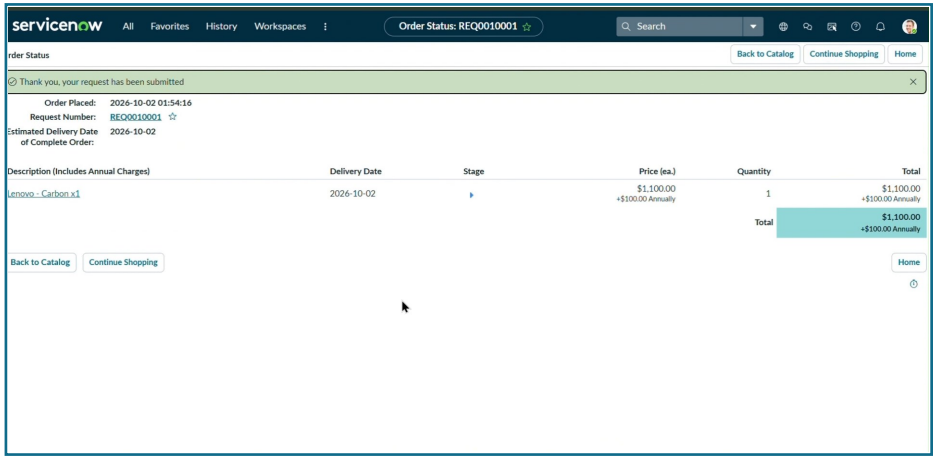

User Stories

Use the below template to list all the user stories for the product.

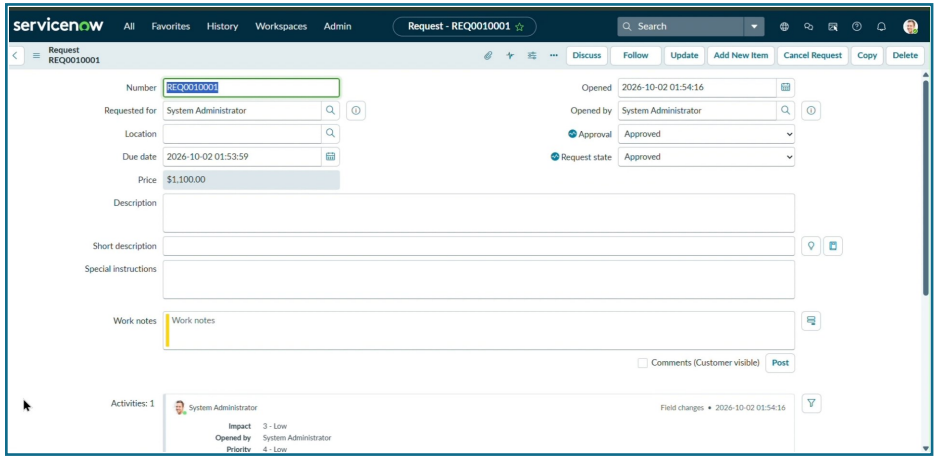

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Employee	Laptop request	USN-1	As an employee, I can choose a standard laptop from the service catalog and submit a request.	Request is created with my role, location and department pre-filled	High	Sprint-1
Employee	Request tracking	USN-2	As an employee, I can see the current status of my laptop request.	Status is shown and updated at every stage	Medium	Sprint-2
Employee	Notifications	USN-3	As an employee, I receive a notification when my request is approved, shipped and delivered.	Notification is sent automatically at each stage	Medium	Sprint-2
Manager	Approval	USN-4	As a manager, I can approve or reject a laptop request from email or mobile in one click.	Decision is recorded and the flow continues without manual steps	High	Sprint-1
Manager	Approval	USN-5	As a manager, I do not have to approve standard requests from pre-approved roles.	Eligible requests are approved automatically; others escalate after 2 days	High	Sprint-2
IT procurement coordinator	Fulfilment	USN-6	As a coordinator, I want stock to be checked and reserved automatically.	Inventory is checked and a laptop is reserved when available	High	Sprint-2
IT procurement coordinator	Purchasing	USN-7	As a coordinator, I want a purchase order created automatically when a laptop is out of stock.	Purchase order is sent to the assigned vendor and linked to the request	Medium	Sprint-2
IT procurement coordinator	Asset management	USN-8	As a coordinator, I want an asset record created and assigned to the employee on delivery.	Asset record is created and assigned with no manual entry	Medium	Sprint-3
IT manager	Reporting	USN-9	As an IT manager, I can view turnaround time and cost savings on a dashboard.	Dashboard shows average turnaround time and number of automated requests	Low	Sprint-3

Screenshots

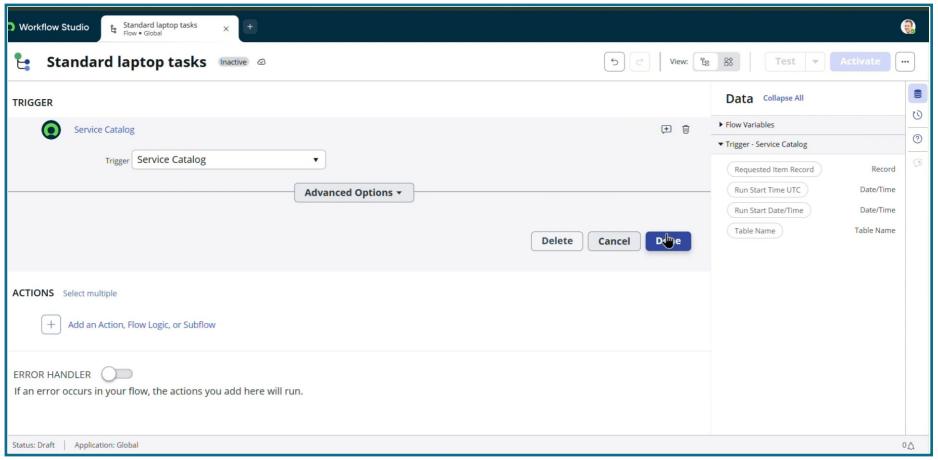

Screenshots of the ServiceNow prototype that correspond to processes in the data flow diagram and to the Sprint-1 user stories.

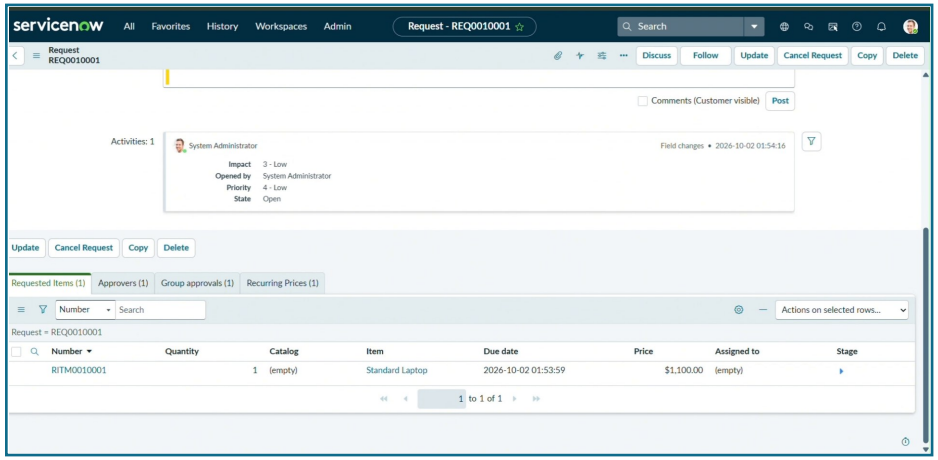

Process 1.0 / USN-1: Laptop request submitted, request REQ0010001 created

Process 2.0 / USN-4: Request approved and decision recorded
