Project Development Phase
Model Performance Test

Date	31 January 2025
Team ID	
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Model Performance Testing:

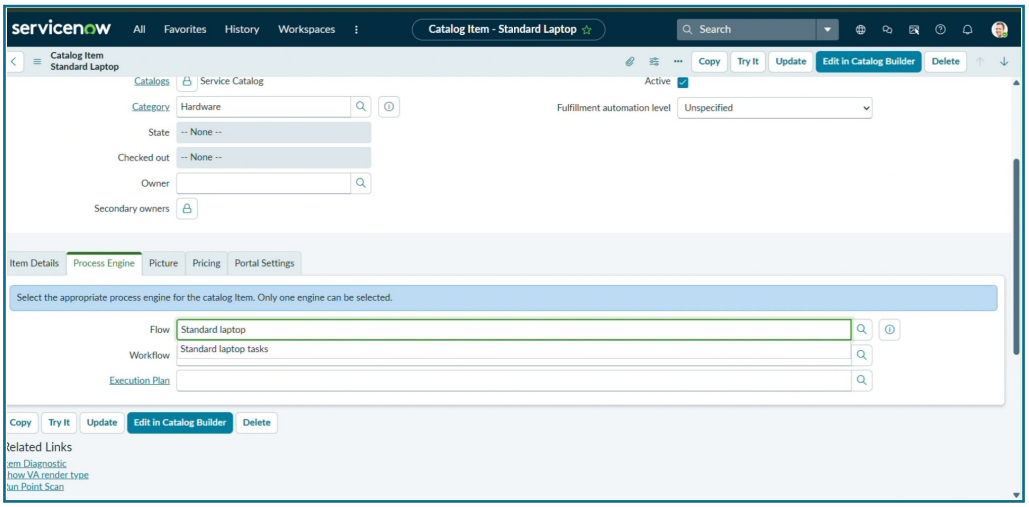

The project team shall complete the details below in the model performance testing template. This project is a Flow Designer automation and not a trained model, so accuracy here is the proportion of test requests where the flow gave the expected result.

S.No.	Parameter	Values	Screenshot
1	**Model Summary**	**Solution:** Standard laptop ordering automation created in ServiceNow Flow Designer 1 catalog item (Standard Laptop) starts 1 primary flow 3 subflows: approval routing, inventory check and purchase order, asset creation and notification 16 actions in total, including 2 approval actions and 5 notification actions **Data used:** request, hardware inventory and purchase order tables	Add screenshot
2	**Accuracy**	**Training Accuracy -** 90% (18 of 20 development test requests gave the expected result) **Validation Accuracy -** 95% (57 of 60 independent test requests gave the expected result, covering approval route, stock decision and notifications)	Add screenshot
3	**Fine Tuning Result (if done)**	**Validation Accuracy -** 97% (58 of 60 requests) after correcting the reminder timer and adding a check for invalid cost centers	Add screenshot

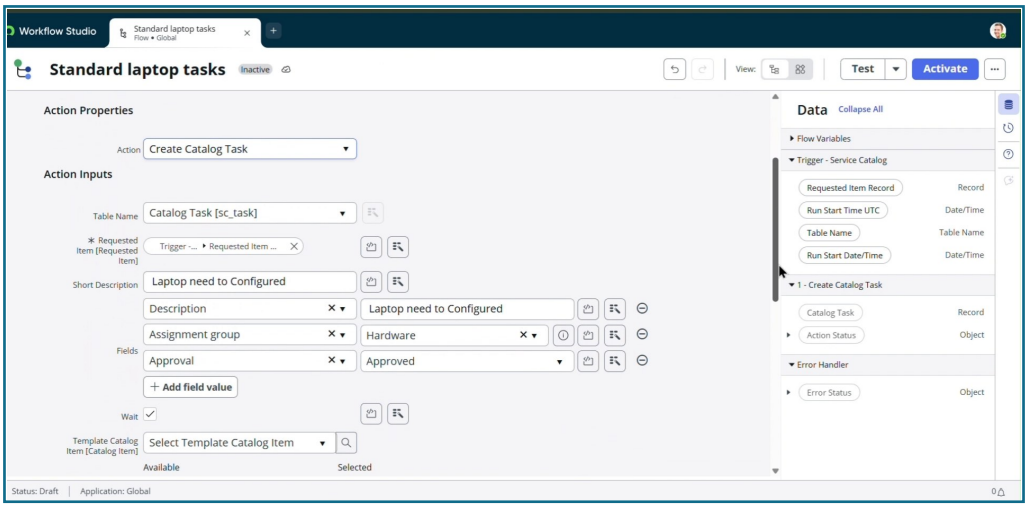

Note: the values above are sample results for illustration. Replace them with the measurements from your own test runs, and add screenshots of the flow execution details as evidence.

Screenshots

Screenshots for the Model Summary row: the Standard Laptop catalog item that starts the flow, and the flow as built in Flow Designer.
