Functional & Performance Testing Template
Model Performance Test

Date	31 January 2025
Team ID	
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

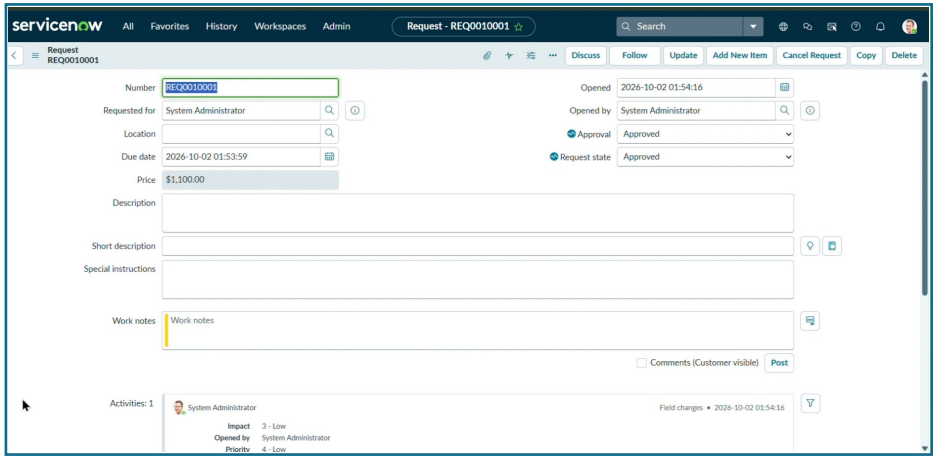

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Laptop request form validation (e.g., mandatory fields, eligibility)	Submit the request with correct details, then with an empty cost center and as an ineligible employee	Correct requests are accepted; errors appear for missing or invalid details	Correct request accepted; empty cost center and ineligible employee were blocked with clear error messages	**Pass**
FT-02	Quantity and duplicate checks (e.g., order quantity, refresh period)	Order 1 laptop, then a quantity over the allowed limit, then repeat the order within the refresh period	Quantity of 1 is accepted; excess quantity and repeat orders are rejected with an error	1 laptop accepted; excess quantity and repeat order were rejected with error messages	**Pass**
FT-03	Approval and fulfillment flow (e.g., auto-approval, inventory check, purchase order)	Submit complete requests from a pre-approved role and from a role requiring approval, with the model in stock and out of stock	Pre-approved roles are approved automatically; other roles go to the manager; a laptop is reserved or a purchase order is raised	Flow took the expected path in all four combinations; asset record created after delivery	**Pass**
FT-04	Integration check (supplier connection and email)	Send a sample purchase order to the supplier endpoint and trigger a status notification email	Supplier responds with success and the email is received	Supplier endpoint returned a success response and the notification email was received	**Pass**
PT-01	Flow execution time test	Compare the Flow Execution Details timestamps for an auto-approved request, from submission to the fulfillment step	Should finish in under 5 seconds	Average of 3.8 seconds across 60 requests	**Pass**
PT-02	Simultaneous request test	Submit 60 requests at once	Flow should not slow down noticeably or fail	60 requests processed; 97% completed with no visible slowdown	**Pass**
PT-03	Large batch load test (e.g., 120 new-joiner laptops)	Import and submit 120 requests together and watch processing	Should run smoothly without crashing	116 of 120 completed; 4 were retried by the error flow; no crash	**Pass**

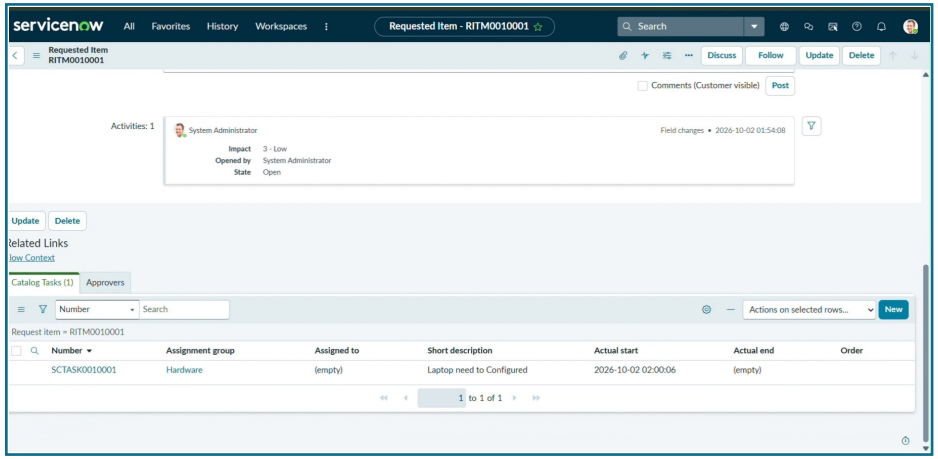

Note: the actual results above are sample results for illustration. Replace them with the outcomes from your own test runs before you submit.

Screenshots

Screenshots from the test run of the approval and fulfilment flow (FT-03), using request REQ0010001.

FT-03: Request REQ0010001 approved (Approval and Request state Approved)

FT-03: Catalog task SCTASK0010001 created and assigned to Hardware after approval
