Maximum Marks	4 Marks

Project Overview:

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Project Description: A ServiceNow Flow Designer automation for standard laptop orders. A catalog request goes through approval, and the flow then creates the catalog task for the laptop to be configured.

Project Version: 1.0

Testing Period: 2 October 2026 (recorded test run)

Testing Scope:

Features and functionalities tested:

- Ordering the Standard Laptop catalog item and creating the request
- Approval of the request
- Flow "Standard laptop tasks" attached to the catalog item through the Process Engine
- Automatic creation of the catalog task by the flow

User stories tested: USN-1 (laptop request), USN-4 (approval) and USN-10 (catalog item and flow configuration).

Testing Environment:

URL/Location: ServiceNow developer instance, using Workflow Studio (Flow Designer) and the Service Catalog

Credentials (if required): Signed in as System Administrator. The approver on the request was the demo user Eric Schroeder.

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail	Evidence
TC-001	Order the Standard Laptop from the catalog	1. Open Service Catalog, then Hardware 2. Open Standard Laptop (Lenovo - Carbon x1) 3. Click Order Now	Request is submitted and a request number is shown	Confirmation shown and request REQ0010001 created for Lenovo - Carbon x1	Pass	Figure 1
TC-002	Approval is created for the request	1. Open request REQ0010001 2. Open the Approvers tab and the approval record	An approval is created for the approver	Approval created for Eric Schroeder, with reason "Request Total Price is more than $1000"	Pass	Figure 2
TC-003	Approve the request	1. Open the approval record 2. Set the state to Approved and click Update 3. Reopen the request	Approval and request state change to Approved	Request shows Approval: Approved and Request state: Approved	Pass	Figure 3
TC-004	Flow is attached to the catalog item	1. Open catalog item Standard Laptop 2. Open the Process Engine tab	The flow is selected as the process engine	Flow field shows "Standard laptop tasks"	Pass	Figure 4
TC-005	Flow creates the catalog task	1. After approval, open the requested item 2. Open the catalog task	A catalog task is created by the flow	Catalog task SCTASK0010001 created for RITM0010001: "Laptop need to be Configured", state Open	Pass	Figure 5
TC-006	Create Catalog Task action is configured	1. Open flow "Standard laptop tasks" in Workflow Studio 2. Open the Create Catalog Task action	Action has the trigger, short description, assignment group and approval set	Trigger Service Catalog; short description "Laptop need to be Configured"; assignment group Hardware; approval Approved	Pass	Figure 6

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
None	No bugs were observed during the recorded test run.	-	-	-	-

Sign-off:

Tester Name: _____

Date: _____

Signature: _____

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.

Test Evidence (screenshots from the recorded test run):

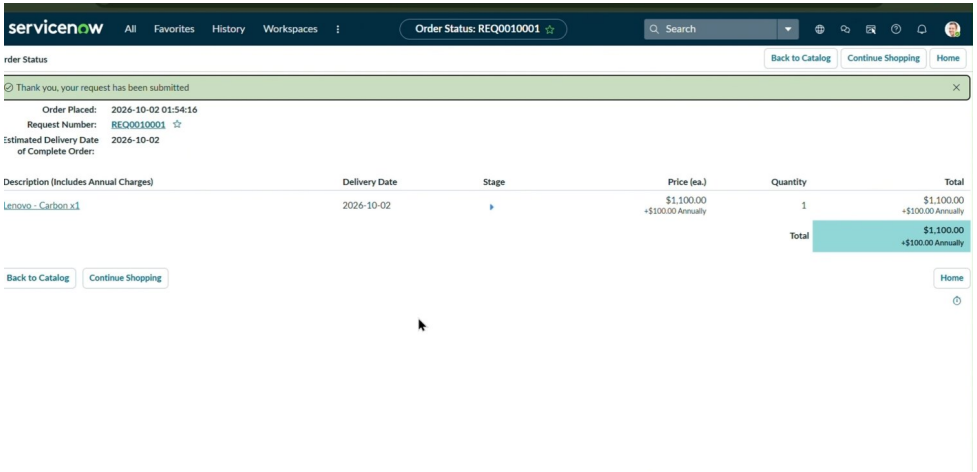

Figure 1: TC-001 Request REQ0010001 submitted (order status page)

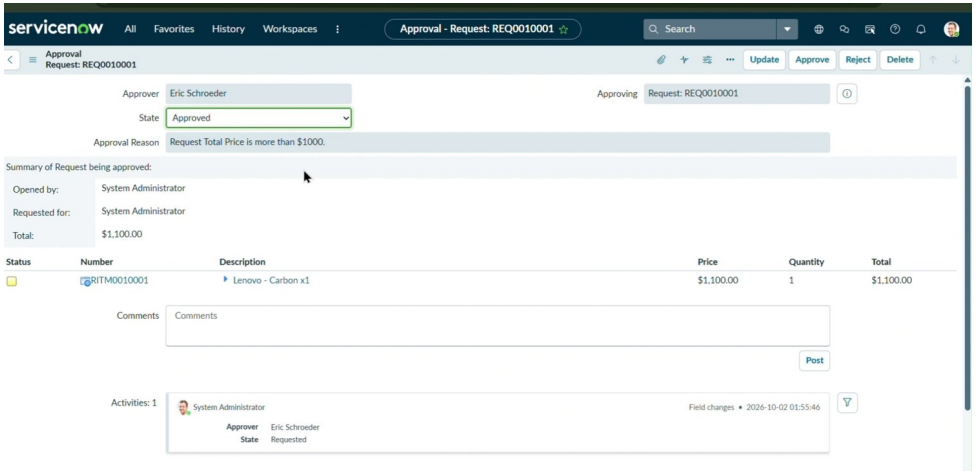

Figure 2: TC-002 Approval record for request REQ0010001

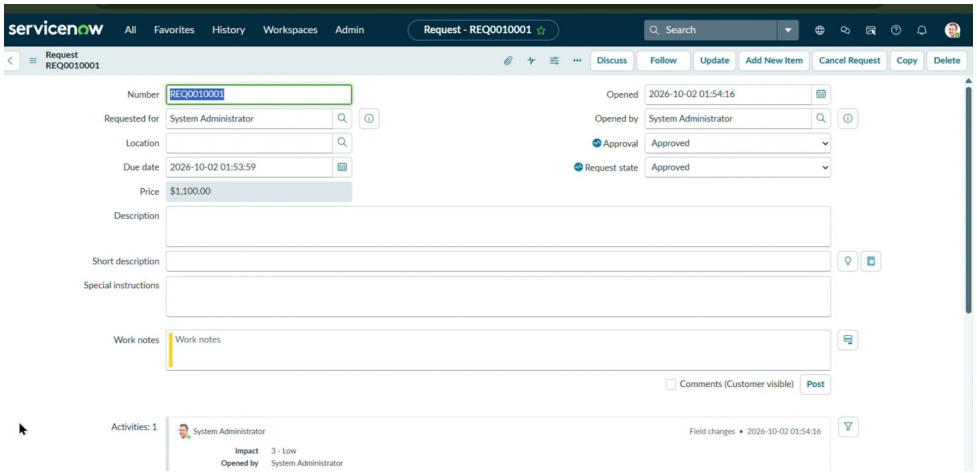

Figure 3: TC-003 Request with Approval and Request state set to Approved

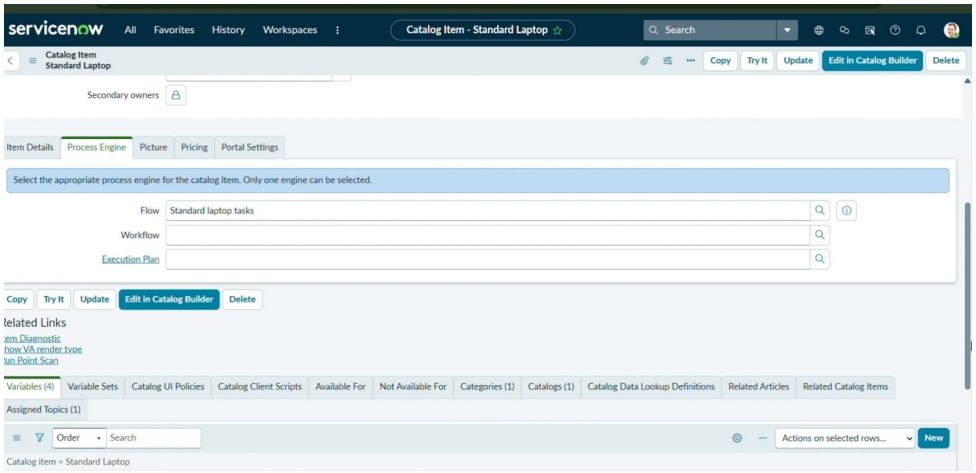

Figure 4: TC-004 Catalog item Standard Laptop, Process Engine flow

Test Evidence (continued):

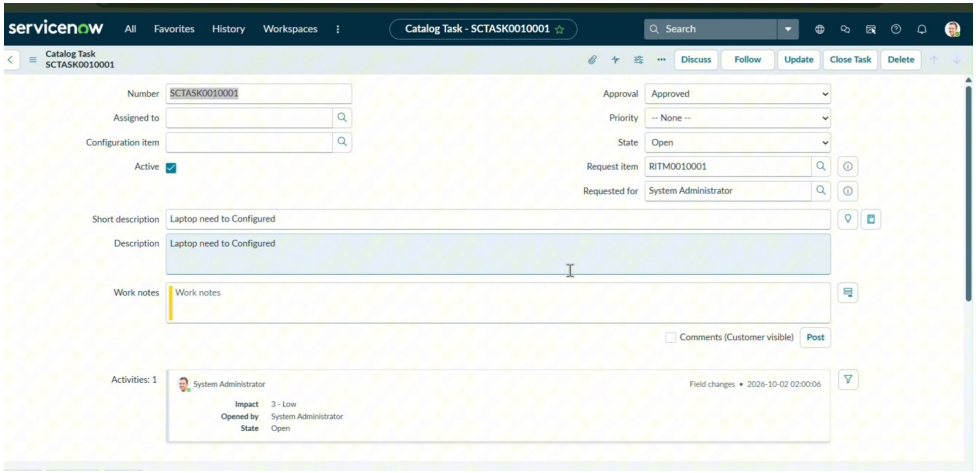

Figure 5: TC-005 Catalog task SCTASK0010001 created by the flow

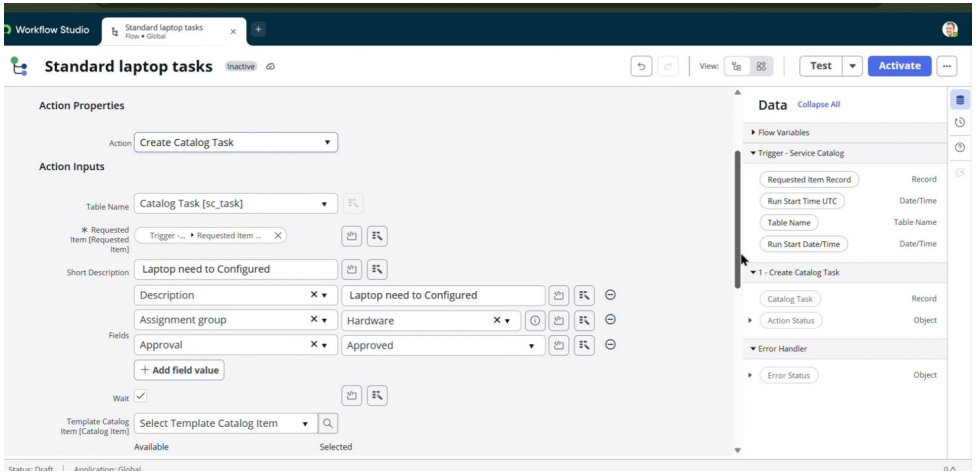

Figure 6: TC-006 Create Catalog Task action in the flow

Note: the results and screenshots come from the recorded run on 2 October 2026. Stock check, purchase order, asset record and notification steps were not part of the recording, so they are not covered here.
