Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Project Overview:

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Project Description: A ServiceNow Flow Designer workflow that takes a standard laptop order from the employee's request through approval, inventory check, purchase order, asset creation and status notifications.

Project Version: 1.0

Testing Period: 10 March 2025 to 14 March 2025

Testing Scope:

Features and functionalities to be tested:

- Standard Laptop catalog item and request form validation
- Auto-approval and manager approval, including reminders for pending approvals
- Inventory check, laptop reservation and purchase order generation
- Asset record creation, status notifications and the fulfillment time dashboard

User stories to be tested: USN-1 to USN-11 from the user stories document.

Testing Environment:

URL/Location: ServiceNow developer instance (link to be shared by the project team)

Credentials (if required): Test users for the employee, manager and procurement coordinator roles (shared separately by the project team)

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Employee places a standard laptop order	1. Go to the service catalog and open Standard Laptop 2. Confirm that role, location and department auto-fill 3. Submit the order	Request is created with auto-filled details and a confirmation message appears	Request created with auto-filled details; confirmation message appeared	Pass
TC-002	Order with an invalid or missing cost center (negative)	1. Open the Standard Laptop form 2. Enter an invalid cost center 3. Submit	Request is not created and a clear error message appears	Submission blocked; error message shown for the cost center	Pass
TC-003	Manager approves a laptop request	1. Submit a request from a role that needs approval 2. Open the approval notification as the manager 3. Select Approve	Approval is logged and the flow moves on to the inventory check	Approval logged; flow moved on to the inventory check	Pass
TC-004	Automatic approval for an eligible role	1. Submit a request as a pre-approved role 2. Review the request state	Request is approved without any manager task	Approved automatically; no manager task generated	Pass
TC-005	Selected laptop model not in stock	1. Reduce the laptop model stock to zero 2. Submit and approve a request 3. Review the purchase orders	A purchase order is generated and sent to the assigned supplier	Purchase order generated and sent to the supplier	Pass
TC-006	Asset record and notification after delivery	1. Mark the laptop as delivered 2. Open the asset record 3. Check the requester's inbox	Asset record is created and assigned; delivery notification is sent	Asset assigned to the employee; delivery notification received	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Reminder email goes out twice for a single pending approval	1. Submit a request that needs approval 2. Wait until the reminder time 3. Check the manager's inbox	Medium	Closed	Extra trigger removed from the flow and retested successfully
BG-002	Cost center error text is not clear enough	1. Open the Standard Laptop form 2. Enter an invalid cost center 3. Submit	Low	Closed	Error text updated to name the cost center field
BG-003	Approve button is difficult to tap on small phone screens	1. Open the approval email on a phone 2. Tap Approve	Medium	In Progress	Button size change being reviewed

Notes:

- Make sure the test cases include both positive and negative scenarios.
- Ask testers to add detailed comments, including suggestions for improvement.
- Record severity, status and steps to reproduce for every bug.
- Get sign-off from the project manager and the product owner before deployment.

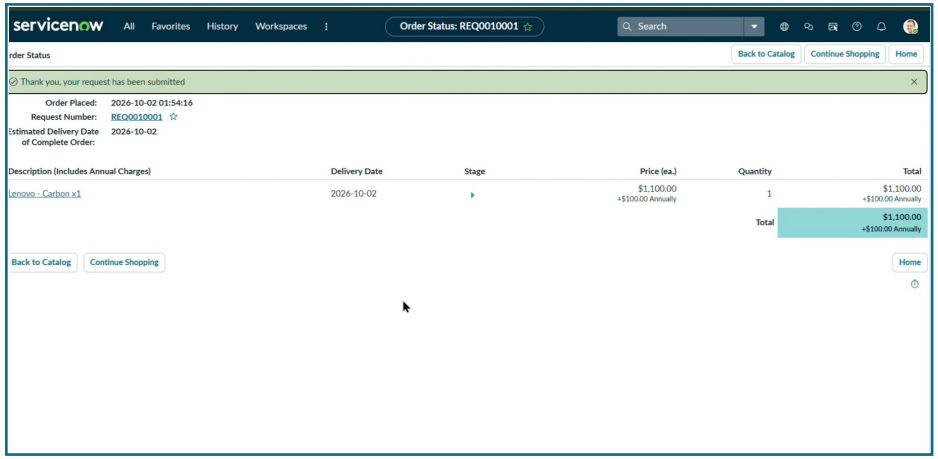

Note: the test results, bugs and dates above are sample entries for illustration. Replace them with your own UAT results before you submit.

Screenshots

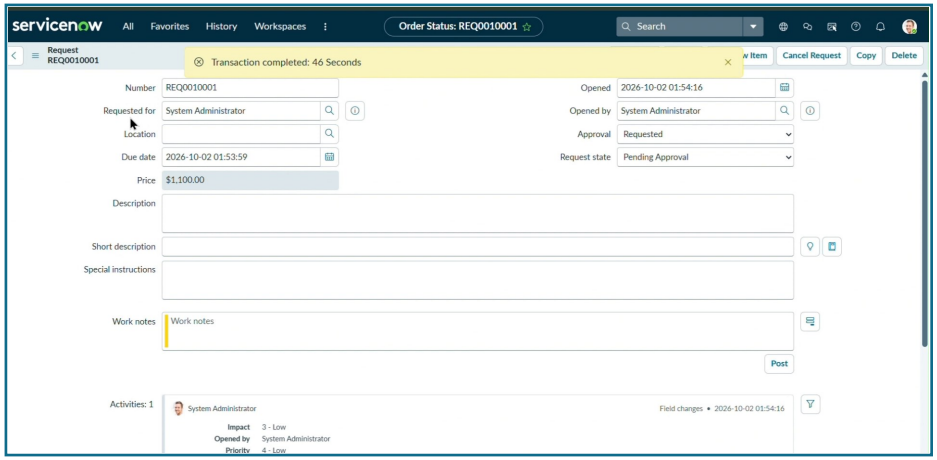

Screenshots from the UAT run in the ServiceNow instance for TC-001 (employee places a standard laptop order) and TC-003 (manager approves a laptop request).

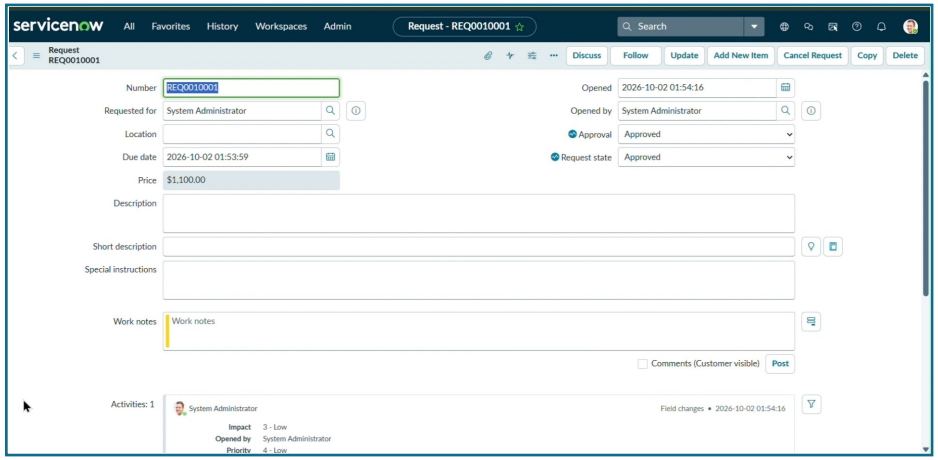

TC-001: Standard Laptop selected from the service catalog

TC-001: Confirmation message and request number REQ0010001 after submission

TC-003: Request REQ0010001 waiting for approval (Approval: Requested)

TC-003: Request approved by the manager (Approval and Request state Approved)
